DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Sakai et al. (US 6,274,960).

Regarding claim 1 Sakai et al. disclose a rotor of an induction starting synchronous motor, said rotor including permanent magnets (6) and induction coils (21,24,27) having both ends short-circuited in a core, wherein said permanent magnets are received in said core and one or more said permanent magnets are arranged side by side in a longitudinal direction of said core to form sets of permanent magnets, and two sets of said permanent magnets form respective poles of said induction starting synchronous motor, and wherein said two sets of permanent magnets forming each of said poles are located inclined in a cross-sectional plane of said core by rotating the two sets of permanent magnets about corners of said permanent magnets nearest said induction coils as rotating axis into directions such that magnetic fluxes induced by said two sets of permanent magnets are cancelled each other.

Regarding claim 2, Sakai et al. core is formed with slots each receiving therein said two sets of permanent magnets, each said slot being formed at its mid portion with

a protrusion and a cavity (25) so as not to permit the permanent magnets to contact each other.
